Portfolio

Experience

Deutsche Kreditbank AG

Machine Learning Engineer / MLOps Engineer

Berlin, Germany

May 2026 – Ongoing

- **Developed an agentic voice platform** for German-speaking customer service in a regulated bank, shipped via GitOps CI/CD on AWS (**Kubernetes, Flux, Helm, Terraform**) with **daily releases**, each tested in isolated review namespaces.
- **Led ticket creation, backlog refinement and specification** in Scrum for a **team of 5**, turning the developer roadmap into scoped work packages that keep a steady release cadence.
- **Set up LLM monitoring and evaluation** with self-hosted **Langfuse** and **Grafana** dashboards for accuracy, data quality and queryability, making model and data degradation visible in production.
- **Developed and review AWS infrastructure in Terraform** (IAM, KMS, S3, Lake Formation, EC2, RDS, Transit Gateway, security groups) within the bank's network and encryption boundaries, documented and presented as RFCs/ADRs.

Deutsche Rentenversicherung Bund

AI Engineer / Tech Lead for Renate

Berlin, Germany

Nov. 2024 – Apr. 2026

- **Led the development of a serverless agentic GenAI platform** (frontend and backend) on AWS, shared by multiple teams building their own LLM workflows serving **~20,000 requests per hour**.
- **Defined SLAs, monitoring, and runbooks** for a citizen-facing service with an accuracy and reliability tracked continuously, operations documented.
- **Designed scalable RAG and ETL pipelines** turning large volumes of unstructured text into structured data for LLM ingestion automated processing that streamlined the work of **4 colleagues**.
- **Shaped a hybrid architecture with enterprise architects**, as the platform had to integrate on-premise systems; AWS and on-prem connected, governed via **RFCs and ADRs** I introduced.

Billie.io

Data Engineer / Data Scientist

Berlin, Germany

Oct. 2022 – Oct. 2024

- **Developed and maintained Python and Kotlin backend services** on the order path, carrying **20,000 orders per day** with **99,99% availability**.
- **Designed CI/CD pipelines** with **GitHub Actions, Jenkins and Kubernetes** for ML-powered systems such that every model change was tested and deployed automatically.
- **Improved data processing for credit-default classification models** with a **20% reduction in defaults**.

Skills

Programming Languages: Python, SQL, JavaScript, TypeScript, Java, Kotlin, Go, HCL

Cloud & Infrastructure: AWS (EC2, Lambda, RDS, DynamoDB, S3, SQS, IAM, KMS, Lake Formation, Transit Gateway, Bedrock, CloudFront), Docker, Kubernetes, Helm, Flux, Terraform, Proxmox

CI/CD & Observability: GitHub Actions, Jenkins, Grafana, ELK Stack, Langfuse

Data & ML: Apache Kafka, Apache Flink, Snowflake, Pandas, TensorFlow, PyTorch, scikit-learn, XGBoost

LLM & GenAI: RAG, agentic workflows, voice AI, Pydantic AI, N8N

Python Tooling: uv, ruff, pytest, FastAPI

Languages: German (Native), Russian (Native), English (C2), Italian (B1), Spanish (B1)

Education

Eberhard Karls University of Tübingen

M.Sc. Data Science (NC: 1.7)

Tübingen, Germany

Oct. 2019 – Oct. 2022

University of Bayreuth

B.A. Development Economics

Bayreuth, Germany

Oct. 2014 – Oct. 2018
